An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In accordance with MPEP 1302.04 the following typographical correction has been made:

In claim 4, line 10, "(57)" has been changed to --(57a, 57b)-- to refer to each of the first and last light beam recited in claim 4.

The following is an examiner's statement of reasons for allowance:

Claim 1 and the claims depending therefrom are allowed since claim 1 recites the steps of directing a light beam bundle from a light transmitter through slits in a sewing machine hook base and through peripheral openings situated in a sewing machine hook body and acquiring a momentary angle of rotation of the hook body and/or a time when one of the light beams is registered by a light receiver.

Claim 4 and the claim depending therefrom are allowed since claim 4 recites a sewing machine comprising a hook base located in a hook body, slits and openings being made in a periphery of the hook body and in a housing of the hook base, and a light receiver registering a location of impingement of a first and/or a last light beam on the light receiver.

It is noted that the box diagram referred to in the specification as a light receiver (at 53, Fig. 4) is interpreted for the purpose of illustration to include a machine control system connected to a light receiver (as disclosed on page 4,

Art Unit: 3765

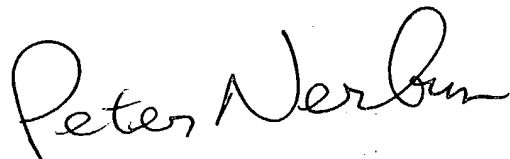

lines 1-4 of the specification) thereby fulfilling the requirement set forth in 37 CFR 1.83(a).

The patents to Sato et al, Arnold, and Bruder et al are cited to disclose methods for monitoring the supply of lower thread on the lower thread bobbin of a sewing machine through light transmitter and receiver devices and other electronic means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
